SafeRad are established pioneers of **S**mall **A**rea **F**or **E**xposure **R**adiography (**SAFER**). We deliver a non-intrusive radiography service transforming traditional radiography downtime into productive time.

- Barriers are set at 1.5m or less
- Controlled area is easy to monitor
- No impact on other nearby activities or personnel

The SafeRad Radiography System achieves:

- Unprecedented radiation safety benefits acknowledged by the UK Health and Safety Executive
- Assists in accelerating construction and maintenance programmes, leading to massive savings.
- No downtime due to radiography sessions
- Superior radiographs using conventional films improved sensitivity, contrast and definition
- No limitations on platework, pipework size or configuration - can be used anywhere.
- Effective corrosion monitoring profile radiography

Typical SafeRad Worksite

As demonstrated to the UK HSE and NRPB

SafeRad Creating a **SAFER** Working Environment

1999 & 2000 Winner of UK Department of Trade and Industry SMART Award
